

Adobe Flex/ AIR tool for real time Market Data table

Application is a powerful and comprehensive tool to display real time market data in a web page as Adobe Flex application and also on the desktop as Adobe AIR. This tool has rich interface and advanced functionality to meet the needs of sophisticated trader to a novice stock watcher. Extensive functionality include multiple ticker symbol groups, simple API to integrate with many market data service providers such as IDC Comstock, Reuters, CQG.....etc. Users can expand real time field display as needed for extra information.

Technology: Adobe Flex 3.0 & AIR UI, Java, Servlets, Spring, JMS, XML, Market Data API, Derby.

Key features:

- Maintain multiple Ticker groups with 25+ symbols in each group
- Display/ Hide groups, Create new groups on the fly
- Displays visual markings for Security types & Markets such as Equities, Futures, Currencies...etc.
- Installed as Desktop or can embed in a webpage
- Accepts real time market feed and easily integrate with multiple data vendors APIs
- Very light weigh with foot print as small as 100KB
- Configurable layout and completely open source based.

Key functionalities:

- Intuitive Search functions to select Ticker Symbols
- Drag & Drop tickers into groups and from one group to another group
- Drop/ Include fields in the display as needed, color code up market / down market updates
- Display Ticker logos instead of the symbols for easier identification of the securities

Key Application Scenarios:

- Display on web pages or finance portals to display market data
- Company Web pages to display company stock along with Industry peers.
- Display market prices for various securities such as Equities, Currency rates, Commodity Markets... etc.
